

LearningLab Series

Rule Boston Camera's ongoing program dedicated to sharing the latest knowledge on production and post-production products, technologies and techniques featuring in-house experts and guest speakers.

THURSDAY **MAR 21**

AN OVERVIEW WITH THE PRESTON LIGHT RANGER 2: A Powerful Tool for the Focus Puller

Senior Engineer, Tim Coughlan, demos the new Preston Cinema Systems' Light Ranger 2 focus assist system. Read his blog post, "Stay Focussed with the Light Ranger 2" at www.rule.com/blog, and join him in person for a hands-on look at why the LR2 is a powerful new tool for the focus puller.

LR2 Features include:

- Displays distance and depth information for up to 16 horizontal measurement zones across the frame
- Two-piece kit: sensor (mounted on camera) and graphical overlay box (mounted on focus puller's monitor)
- Features manual and autofocus modes with seamless transition between the two
- Sensor connects to MDR-3 or MDR-4 via Serial port
